A landscape photograph showing a long pipeline in the foreground, supported by wooden posts, stretching across a green field. In the background, there are rolling hills and a valley under a cloudy sky.

Reliable, innovative site access and ground protection are key to getting your projects off on the right foot. At Sterling, everything we do is about making sure you achieve success.

Sterling has the experience and knowledge to serve as a true site access partner. We combine advanced technology with best-in-class customer service to offer everything from initial site access planning and innovative matting products to outstanding safety and environmental compliance. We know what it takes to make your project a success, and you have our unwavering commitment to help you get the results you need.

“

Sterling has been responsive, cooperative, and very averse to presenting change orders ... They are a true partner.

TURNKEY SERVICES

ADD VALUE TO YOUR PROJECT
WITH START-TO-FINISH SUPPORT

Why not make your next project easier and more efficient?

With turnkey services, Sterling takes on work to get your site up and running. It begins with expert consultation that identifies the best possible site access solution for any environment. Getting us involved early increases overall value because it results in a smarter, faster, and less costly project.

- **Consultation based on industry best practices and Sterling's own data and insights**
- **Detailed planning, logistics, and management: Right of way clearing, site preparation, road building, culverts, mat installation, washing, removal, site restoration**
- **Expert construction of temporary access roads, crane pads, work platforms, and water crossings**
- **Anywhere, anytime access to remote or challenging locations**

Knocking it out of the park due to your knowledge of the product, working safely, ability to manage schedule, and most importantly looking out for the customer's best interest in cost and time.

GAME-CHANGING SOLUTIONS

DRIVE SUCCESS WITH OUR BREAKTHROUGH PRODUCTS AND DEEP KNOWLEDGE

Your projects have an array of site access challenges, and we are solving them with innovative solutions and high-quality products.

TerraLam® is redefining the industry standard as a highly engineered and environmentally sustainable mat born out of our vast application experience.

We continually feed field and customer observations into our R&D processes to ensure our products are made with your changing needs in mind.

- **Broad selection of mats, including the game-changing TerraLam CLT mats — lighter, faster, and longer lasting than traditional mats**
- **Precision, in-house manufacturing process ensures optimum consistency and durability**
- **Largest CLT mat manufacturing facilities in North America**
- **Flexible mat rental options that help you avoid logistics and maintenance costs**
- **Our employees come from industries we serve, applying real-world knowledge every day**

TERRALAM®

LIGHTER | FASTER | LONGER LASTING

17 Trucks
TerraLam 508s

33 Trucks
Timber Mats

Faster installation streamlines access and reduces costs

Cross-Grain Technology™ enables longer life

Environmentally sustainable and easier to clean

ENVIRONMENTAL EXPERTISE

IMPROVE SUSTAINABILITY AND REDUCE YOUR ENVIRONMENTAL FOOTPRINT

Getting your project done efficiently and protecting the environment — it's a tough balancing act. At Sterling, we make it possible to do both. We have extensive environmental regulatory expertise, and we consider environmental impact and sustainability at every step of your project.

We will plan and recommend ground protection products with regulations and efficiency in mind.

- **Vast experience protecting environments, wildlife, and cultural and historical sites while reducing reclamation costs**
- **Lighter, sustainable TerraLam mats help reduce the impact on hardwood forests**
- **Mobile, on-site mat washers prevent cross-contamination between jobsites**
- **Expertise across national and state environmental regulations**
- **Lighter TerraLam mats require fewer emission-producing trucks**

SAFETY COMMITMENT

SET UP A JOBSITE THAT PUTS PEOPLE FIRST

At Sterling, we believe that nothing matters more than the safety of your people, and we share your interests in protecting your team, the public, and your equipment.

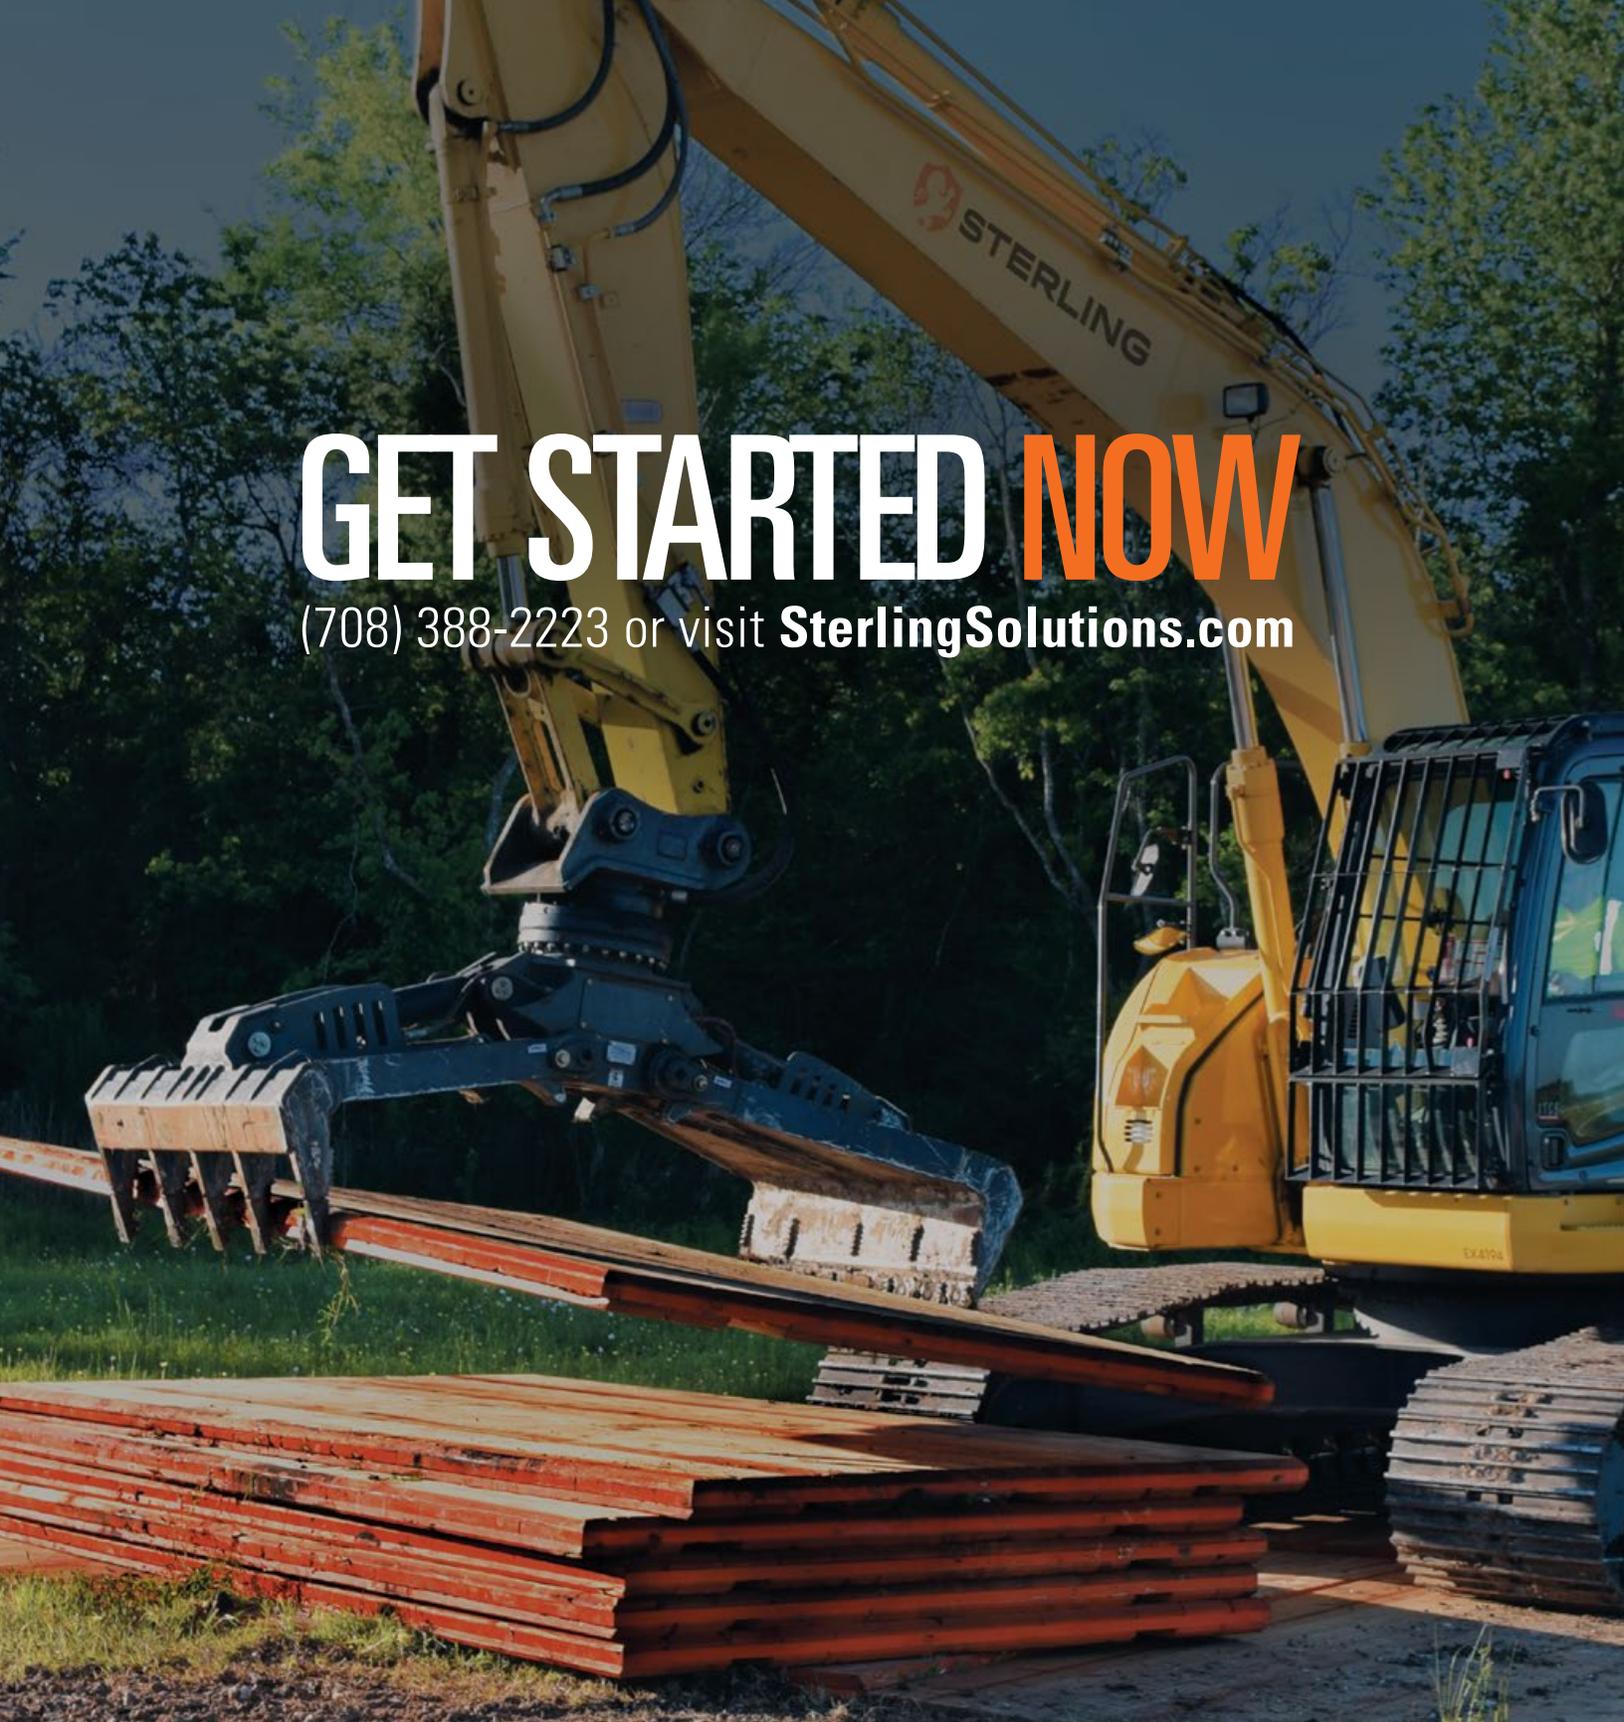

From our products and regulatory expertise to our active involvement in the safety community, we help you maximize jobsite safety. With Sterling's robust safety approach, you'll be better protected from legal liability and avoid accidents that cause delays and drive up costs.

- **Expertise across national and state safety regulations**
- **Safer, higher-quality TerraLam® CLT mat construction reduces risks to crews and equipment**
- **Full-time safety coordinators and active participation in respected third-party safety organizations**

Their attention to detail and safety are the drivers that keep them above their competition.
