

**For immediate release:**

## **WIKAL Mobile Control Exhibits at ConExpo – Festival Grounds**

### **Booth #F101819**

WIKAL Mobile Control (WMC) provides operator aids, controls, upgrades, and sensors including load moment indicators, wireless/wired load, angle, and A2B systems for lifting equipment.

WMC will introduce the new LWG cable reel series that has been upgraded with the latest mechanical signal transmission and electronics technology. The upgraded cable reels feature standardized gears / length sensors, optimized electronics, improved length cable connection, and a new slip ring design that provides higher current ratings.

In addition to the cable reel upgrades, WMC will also present the new gSENS LWG610 length and angle sensor. The gSENS LWG610 features a compact and robust design that provides an economical option that is suitable for use on a variety of lifting applications including telehandlers, service trucks, industrial cranes, and reach stackers. With an IP65 ingress protection rating, the gSENS LWG610 is designed for use in challenging environments.

WMC will also launch the cSCALE S9 controller that includes a new NXP processor, 256 MB flash memory, 144MB RAM, and ETH-to-CAN Gateway extension. This new controller also features improved boot-time and faster flash process via a USB-stick.

Also on display is the qSCALE lx load moment indicator as well as the cSCALE for use in any application from monitoring standard to custom control solutions.

These systems and sensors meet OEM & retrofit requirements in lifting applications.
